

Application development

Custom project quote

A staged project quote after discovery. Platforms, integrations, scope, and ongoing costs are agreed before work begins.

Define the release

Agree on users, platform, features, data, integrations, and acceptance criteria.

Build in stages

Review working milestones and test the important flows as the product takes shape.

Prepare the handoff

Confirm release requirements, ownership, documentation, and an ongoing support plan.

Written estimate

I confirm the deliverables, schedule, revisions, usage, equipment, and any outside costs with you before work begins.

Project budgets

My listed rates are the standard for commercial and brand work. I'm open to discussing reduced rates for independent, micro-budget, or cause-led projects. I may occasionally work pro bono when I have the time and resources. Let's talk about your project and budget before deciding.
