

OCTOBER 2026 / SERVICE RATES 02

Digital tech.

TETHERED STILL PHOTOGRAPHY AND CAPTURE MANAGEMENT

Digital tech labor for commercial still photography. I support the photographer and client review process with an agreed tethered capture workflow and organized delivery.

SHOOT DAY / LABOR

\$1,000

Up to 10 hours / full-day minimum

PREP / SCOUT	\$800
Up to 8 hours	
AFTER 10 HOURS, THROUGH 12	\$150 per hour
After the included 10 hours	
AFTER 12 HOURS	\$200 per hour
Each additional hour	

SCOPE OF SERVICE

Includes tethered capture support, session and folder setup, file naming, image review, basic capture checks and agreed backups during the booked day. Capture One or another workflow is confirmed against the camera, operating system and software versions during prep.

HANDOFF AND POST PRODUCTION

Includes the agreed session structure and transfer to production's approved drives. Final retouching, extensive processing, off-site editing and long-term archive storage are additional. A stills digital tech booking does not automatically include a full motion DIT workflow.

EQUIPMENT AND STAFFING

The labor fee excludes the capture workstation, calibrated displays, cart, tethering hardware, power, software rentals, storage drives and delivery. Quote these separately from the equipment rate card or an approved rental vendor. Remote review, multiple capture stations and hybrid stills plus motion workflows require a separate scope.

TIME AND BOOKING

Shoot hours run from call through final handoff, including setup, wrap and on-site waiting. Prep extensions are quoted separately. These are service billing terms; payroll, union agreements and applicable overtime requirements take precedence. Equipment rental week discounts do not apply to labor.

All rates are USD, excluding applicable taxes and approved expenses. The written estimate confirms scope, equipment, travel, payment, cancellation and any payroll costs. Share the photographer's capture workflow, camera and tether connection, expected volume, number of review screens, backup plan and required handoff format.
